### EXPERIENCE

#### Research and Development Engineer | 2023-2024

Bdtask Company Limited

- I have conducted research and development on the Django framework, a powerful and user-friendly web development tool. It enables the rapid and secure creation of websites and applications. This experience will be valuable for efficiently working on future projects.

#### Office Assistant | 2020-2021

Charjashordi Union

- I worked as an assistant in our union council, serving people as a computer operator. My role involved providing various services and ensuring smooth operations for the community.
- 

### EDUCATION

#### Faridpur Polytechnic Institute | 2020-2021

Diploma in Engineering

- CSE
- Last semester: CGPA 3.90

#### Govt. Saber Miya Jashimuddin(S.J) Model High school | 2019-2020

SSC

- GPA: 4.67
- 

### PROJECTS

#### Library Management | 2024

## CERTIFICAETS

### Web Application with Bdtask

I have learned from this company how to use Python, how to build projects with the Django framework, how to solve problems, and how to create APIs. I have gained knowledge of using various technologies and applying them to solve real-world problems. Through the Django framework, I have learned how to develop advanced web applications, while also enhancing my skills in scripting and problem-solving with Python.

### Full Stack Development with Ostad

I have learned from here how to become a full-stack developer. I have learned to create front-end and back-end projects using HTML, CSS, Python, and Django. Through this, I can work on all aspects of web development, such as designing user interfaces (front-end) and managing servers and databases (back-end).

## How to reach me
